Are you passionate about e-waste? Then look no further! We are constantly looking for highly motivated students to join our research in the following area:

The amount of electronic waste (abbr.: e-waste) has been constantly increasing in the developed world as well as in countries overseas. Countries like Germany have established mechanisms to deal with these waste flows. But nevertheless exporting of broken electronic devices takes place under the cloak of development aid. Within the destination countries these flows are both seen as a curse and blessing.

Possible research areas of a bachelor/master thesis can be:

- Reasons for e-waste in Germany
- User behaviour regarding electronic devices and their disposal
- Current waste legislation in Germany
- Role of the municipalities and local recycling centres
- Business models for achieving Circular Economy in e-waste treatment

Minimum Skills Required:

- Pursuing a Bachelor’s or Master’s degree in the field of Economics or adjacent fields
- Fluency in English and / or German
- Ability to think ahead and to be creative

We offer:

- Intensive support
- A young and open-minded team
- The possibility to work from wherever you want

For more information don’t hesitate to write an e-mail or phone me.
